

# **Datapath.io**

NP<sup>2</sup> (Network Performance Platform)

Making your network faster by decreasing latency between the cloud/bare metal and your end users.

# Most Played PC Games 2015

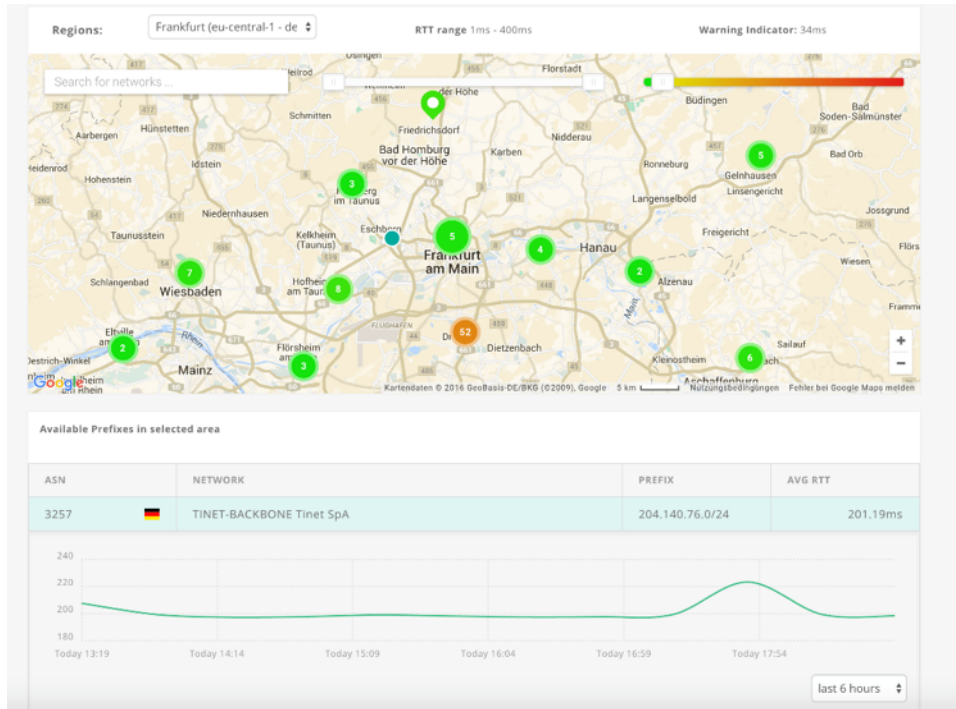

Name	% of total time played on Raptr	Type of Game	Sensitivity to Latency
League of Legends	22.92%	MOBA	High
Counter-Strike G	6.88%	Ego-Shooter	High
Fallout 4	5.78%	Role-play	High
DOTA 2	5.09%	MOBA	High
World of Warcraft	4.82%	Role-play	Medium

# Weaknesses & Chances

- Last mile access is limited at primetime
- Hosters focused to provide low-priced compute service
- Hosters save cost on transit
- Bets on E-Sports, millions of prize money for teams, streaming websites pay up to 300K for gamers to be on their platform
- AS3320 likes gamers. Then: ADSL fastpath. Now: MagentaEINS
- What about Hosters? Carriers?

# Our Approach

Monitoring

Mitigation
